

Improving Health ~ Eliminating Disparities

CJA Health Innovation Lab

**Are you ready to take your community health work to the next level?
Learn from innovation experts and peers from across the country!**

For the first time, CJA is offering a new benefit for members:
the CJA Health Innovation Lab!

What is an Innovation Lab?

This year-long, virtual lab will teach participants how to think innovatively and propel a program or initiative forward. The inaugural cohort of participants will be a learning community and individuals will both share and learn from participants' knowledge and experiences.

How does the CJA Health Innovation Lab work?

Participants will attend a series of interactive webinars and office hour consultations in 2018. The best participants in the Health Innovation Lab will present their work in a plenary at the 2019 annual CJA conference (exact dates and location to be announced). Health Innovation Lab participants will give pitches at a longer webinar in December during which the selection committee will choose plenary presenters.

Timeline

March 1, 3:00pm Eastern: Introductory Webinar — Learn How to Apply
